YEAR 10 PROGRAMME

Students in Year 10 are entering the Senior School and are beginning the journey towards their future pathways. There is an increased workload and greater expectations of independent study. Students will undertake examinations in all their studies for the first time at the end of Semester 1.

Throughout Year 10, there is a strong emphasis on career exploration and future pathways. Students undertake the Careers Fast Track program, including counselling interviews, model employment interviews, and listen to quest speakers. All Year 10 students also participate in the work and career experience program.

This handbook outlines possible Year 10 electives. Its purpose is to provide parents and students with an overview of the course structure and a description of the various electives.

All Year 10 students will study two semesters of English, Mathematics, Science, and Humanities. In addition, they will choose 4 electives (two per semester).

If students choose to study a language, it must be undertaken as a two-semester elective.

If a student chooses to study ADVANCE (Incorporating Outdoor Education), it must be undertaken as a two-semester elective. Students who include any Outdoor Education electives, including ADVANCE in their choices, will be required to meet the conditions for selection outlined in the College's Outdoor Education Policy.

VCE ACCELERATION FOR YEAR 10 STUDENTS

Selected students may be offered the opportunity to undertake a VCE Unit 1 and 2 elective as part of their Year 10 program. Offers will only be able to be made for subjects where both class sizes and the timetable blocking structure allow for year 10 students to study a particular VCE Subject.

Students are selected on the basis of their performance in Year 9. Semester reports need to show that, in a particular subject, the student is performing at a VicCurric level of 'B' or above, and have obtained an attainment of 3 or 4 in the learning attributes on their final process reports during the semester. (For English, LOTE and Mathematics, the VicCurric level needs to be 'A')

For students who take up the offer, the VCE units will replace two Year 10 semester-length electives.

YEAR 10 ELHES

The Year 10 ELHES curriculum is a continuation of the Year 9 ELHES curriculum. Students will continue with an accelerated curriculum in English and Humanities, undertaking Units 1 and 2 of Literature, Unit 1 of History and Unit 1 of Global Politics. Students will also study Mathematics and Science as core subjects with electives selected from the Year 10 elective choices.

The specific ELHES English and Humanities subject information is provided following the main curriculum information.

CORE SUBJECTS

ENGLISH

THIS IS COMPULSORY FOR ALL STUDENTS FOR BOTH SEMESTERS

This unit is focussed on the study of language by exploring a variety of texts and forms of written and spoken expression. Students learn to appreciate, enjoy and use language. They will develop their ability to explore complex themes, ideas and issues, and develop their ability to refine and express their ideas, both verbally and in the written form.

AREA OF STUDY

- Reading and the study of texts
- The craft of writing
- Speaking and listening

STUDENTS WILL FOCUS ON THE FOLLOWING FORMS OF WRITING:

- Creative
- Persuasive
- Expository
- Analytical responses to texts/media
- Argumentative and issues based writing

LEARNING OUTCOMES

- Read, view, analyse and discuss contemporary and classical texts
- Analyse and discuss informative and argumentative texts
- Compare and contrast the typical features of particular texts
- Plan, write and present several pieces of writing using various styles
- Proofread and edit work for accuracy, consistency and clarity
- Engage in discussion and provide and justify opinions
- Prepare and deliver presentations that explore complex issues or information to engage an audience

ENGLISH AS AN ADDITIONAL LANGUAGE

This study is for Non-English-speaking students who have been residents in Australia for less than seven years. Tuition in the student's homeland must be in a language other than English to qualify for this subject.

DESCRIPTION

- Reading a variety of texts
- Text response: including novels and films
- Writing folio: expository, creative, argumentative, analytical
- Listening tasks
- Oral presentations
- Language skills: sentence structure, vocabulary, punctuation and paragraphing

LEARNING OUTCOMES

- Speaking and listening
- Reading, writing and viewing

TOPICS

- Issues in the media
- Film study - 'The Sapphires'
- Graphic fiction text - 'Coraline'
- Comparative film and text study
- Grammar, spelling, vocabulary - Education Perfect
- Persuasive Language

GENERAL HUMANITIES

This compulsory unit aims to develop the students' skills and knowledge in the following areas:

- Government in Australia and the Asia Pacific regions
- Careers/Work Education
- Work Experience (completion of work Experience is a compulsory component of the course)
- Citizenship
- History
- Geography

TOPICS

- Educational/Training pathways
- Career Options
- Job application/interview skills
- OHS and Work Experience
- Civil rights and responsibilities
- The role of Australia in the global community
- WW2
- Social changes throughout the 20th Century, including changes to human rights
- Environmental challenges
- Global wellbeing
- The global economy
- Consumer choice

LEARNING OUTCOMES

- Analyse vocational pathways and education and training requirements to develop possible career paths and work opportunities.
- Demonstrate effective job application and interview skills.
- Demonstrate an understanding of the rights and responsibilities of an Australian citizen and the Australian government.
- Analyse events which contributed to Australia's social, political and cultural development.
- Evaluate the contribution of significant Australians to Australia's development.
- Analyse the impact of some key wars and conflicts in the twentieth century.
- Analyse the impact of human activities on natural systems.
- Describe the impact of resource development and use on a natural environment.
- Identify strategies to address the use and management of our natural environment.
- Describe the relationship between current use of the environment and future availability of resources.

SCIENCE

DESCRIPTION

Science helps us to understand why we need to wear seat belts in motor vehicles.

Year 10 science is an opportunity to develop your understanding of Biological, Chemical, Earth and Physical Sciences and how they relate to everyday life. The year 10 science program will help you to deepen your scientific knowledge; and to decide which fields of science you find the most interesting. It will also help you to understand where science fits within career pathways and specific career choices.

TOPICS

BIOLOGICAL SCIENCES

- The transmission of heritable characteristics from one generation to the next involves DNA and genes.
- The theory of evolution by natural selection explains the diversity of living things and is supported by a range of scientific evidence.

CHEMICAL SCIENCES

- The patterns of Chemistry can be found in the Periodic Table of the Elements, and the way chemical names and formulas are written.
- Different types of chemical reactions are used to produce a range of products and can occur at different rates.

EARTH AND SPACE SCIENCES

- The universe contains features such as galaxies, stars and solar systems and the Big Bang theory can be used to explain the origin of the universe.

PHYSICAL SCIENCES

- The motion of objects can be explained in terms of forces and energy

MATHEMATICS

Year 10 Mathematics is compulsory in both semesters. Based on their performance in Year 9, students may be offered one of three alternative Mathematics subjects:

- General Mathematics, or
- Enrichment Mathematics, or
- Foundation Mathematics

These programs aim to give each student the opportunity to achieve their maximum individual improvement and to better engage with Mathematics. Regardless of which option is studied, no student will be disadvantaged. Extension and remedial options will still be available within all Year 10 General Mathematics classes, and the College will continue to aim to prepare all Year 10 students for future studies. Year 11 Mathematical Methods will be open to both Enrichment and General students who demonstrate the necessary attitude and skills during Year 10.

GENERAL MATHEMATICS

This subject aims to give students the opportunity to:

- Demonstrate useful mathematical and numeracy skills for successful general employment and
- Functioning in society
- Develop specialist knowledge in mathematics that provides for further study in the discipline
- See mathematical connections and be able to apply mathematical concepts, skills and processes in posing and solving mathematical problems
- Build confidence in their own knowledge of mathematics, and to feel able to acquire and apply new knowledge and skills when needed
- Become empowered through knowledge of mathematics as a numerate citizen, able to apply this knowledge critically in societal and political contexts
- Develop understanding of the role of mathematics in life, society and work, the role of mathematics in history and mathematics as a discipline – its big ideas, history, aesthetics and philosophy.

TOPICS (SELECTED FROM):

- Indices & Scientific Notation
- Linear Relationships and Graphing
- Expansion and Factorisation
- Measurement
- Geometry
- Trigonometry
- Quadratic functions
- Probability
- Statistics
- Financial Mathematics

ENRICHMENT MATHEMATICS

Enrichment Mathematics is specifically designed to meet the needs of students who are passionate and highly engaged with their mathematical studies. While selecting from the same topics as Year 10 General Mathematics and additional topics students will have the opportunity to undertake acceleration activities and enriched tasks designed to expand their Mathematical knowledge and skills.

Selection will be based on demonstrated strong ability in Year 9 Mathematics, especially in algebra, as well as a strong, positive attitude to learning. Students who are one semester or more ahead for Number and Algebra on their Semester 1 report, and who have been awarded a 'Very Good' or higher rating on all their work habits will be offered a place. A second round of offers may be made based on Semester 2 results and availability of places.

FOUNDATION MATHEMATICS - UNITS 1 & 2

Foundation Mathematics is a Year 11 VCE subject designed for students who are unlikely to undertake additional VCE mathematics studies in the future. There is a strong emphasis on using Mathematics in practical contexts relating to everyday life, recreation, work and study. These units will be especially useful for students undertaking VET studies.

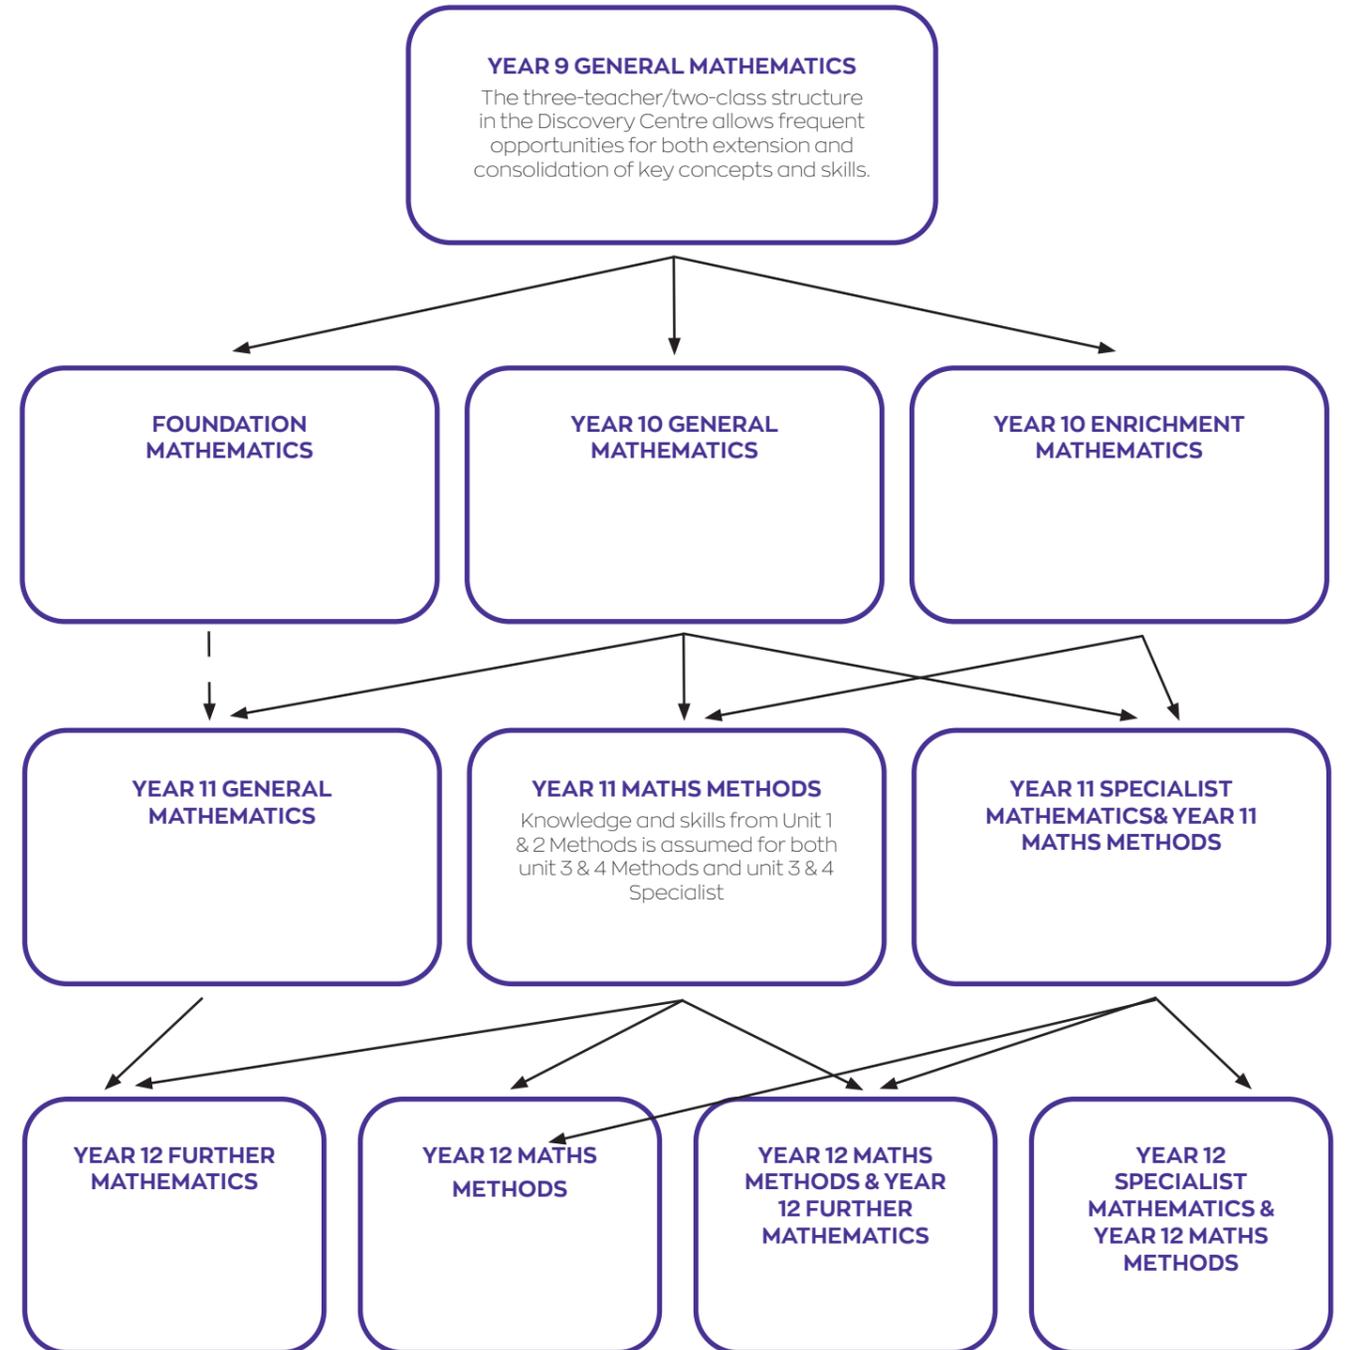

AREAS OF STUDY:

- Space, shape and design
- Patterns and number
- Handling data
- Measurement

Foundation Mathematics offers students two extra units towards completion of their VCE or VCAL. Due to our integrated Senior Timetable, involvement in the Foundation Mathematics program will not affect choices or performance in other subjects. While studying Foundation Mathematics at Year 10 will not preclude students from undertaking General Mathematics in Year 11, a strong performance in Foundation is a requirement for students who would otherwise wish to proceed to Year 11 General Mathematics.

Selection will be based on Year 9 Mathematics results. Students who are, overall, more than one semester behind on their Semester 1 Mathematics report may be recommended for a place, after a Parent Interview. Requests from parents and carers are welcome and will be considered as part of the course selection process.

MATHEMATICS FLOWCHART

THE CREATIVE ARTS

DANCE

DESCRIPTION

Students explore a range of dance styles including:

- Basic ballet
- Contemporary dance
- Jazz
- Hip-hop/Street dance
- Latin Dance

LEARNING OUTCOMES

- **DANCE PERFORMANCE:** Students choreograph and perform a dance/s using a selected dance style.
- **DANCE APPRECIATION:** Students analyse selected dance presentations as seen from video and using the dance elements, learn to de-construct the meaning behind dances.
- **MAINTENANCE OF DANCES:** Students learn basic physiology and biomechanics. Students discuss nutrition for dances, injury prevention and basic first aid related to dance injuries

DRAMA

DESCRIPTION

This study introduces students to:

- Solo Performance incorporating a variety of theatrical styles and conventions
- Group performance including interpreting established texts, writing imaginative scripts using established dramatic forms and styles.
- Developing and understanding of analytical skills.
- In Term 2 students will be offered the opportunity to work with the Malthouse Theatre Suitcase Series creating a play that will be performed with a variety of schools at the Malthouse

TOPICS

- Character building/acting skills
- Improvisation
- Use of dramatic elements, forms, styles and conventions to convey meaning
- Interpretations of texts, characters and scripts from a range of cultural sources.
- Practical demonstration of one stagecraft element

LEARNING OUTCOMES

- Make and present drama that explores a range of themes, issues and ideas.
- Structure and present dramatic works to chosen theatrical styles and forms.
- Analyse and interpret the structure, content and aesthetic qualities of drama and the role of drama within different cultural contexts.

MUSIC

DESCRIPTION

This study introduces students to:

- Solo/group performance incorporating a wide variety of musical styles.
- Musical analysis and development of aural skills, theory and Music notation.
- The use of music technology including software to compose and arrange music.
- Effective approaches to Personal Practise, Performance and Composition.
- Investigate and study the development of contemporary music.

TOPICS

- Group Performance
- Popular Contemporary Music
- Approaches to stylistic versatility
- Composition and arrangement
- Musicianship
- Develop a practise routine

LEARNING OUTCOMES

- Learn, rehearse and develop an approved repertoire of music for live performance
- Develop musicianship skills including aural and theory skills, rhythm, analytical and stylistic depth of knowledge
- Develop accomplished instrumental skills on a chosen instrument/vocals

MEDIA

DESCRIPTION

Studying Media will provide students with the opportunity to develop vital skills and knowledge relating to mass communication in the modern age.

Media texts (films, photographs, newspapers, etc.), technologies (cameras, editing software) and processes (planning, creation and publishing) will be analysed from different angles including their structure and features, methods of production and distribution, audience reactions and their impact on society.

The study of Media is relevant to students with a wide range of interests and skills, including those who wish to pursue further study in Media at VCE, the tertiary level or in vocational education and training settings, as well as providing valuable knowledge and skills for active participation in contemporary society.

AREAS OF STUDY

- Media forms including:
- Audio visual media (film, television, radio, video, photography).
- Print-based media (newspapers, magazines and related publications).
- Digital media technologies (the Internet, computer games and interactive multimedia).
- The media and its relationship with society and culture.

TOPICS

- Investigation of several aspects of the media industry and identifying what makes successful products.
- Using movie making software, digital photography and audio software to create specific designs and resources, ie. advertisements, film, photo storyboards, magazine layouts.
- Create and publish a short video film.
- Develop teamwork and communication skills between the group members.
- Encourage leadership and/or supervisory roles within teams.

LEARNING OUTCOMES

- Analyse and develop solutions to information problems, for example, creation of a short film, both individually and as a team member, using a range of skills, processes and equipment.

STUDIO ARTS (TRADITIONAL & MODERN)

DESCRIPTION

This study introduces student to:

- Drawing/painting
- Printmaking
- Pottery/sculpture
- Art history

and is strongly recommended for students wanting to study Year 11 and Year 12 Studio Art.

TOPICS

Overall Focus: Modernist Art of the 20th Century.

- Drawing: Still life, landscape, portraiture, figure studies
- Painting: extension from one of the above, beginning with experimenting with acrylics, watercolours and oils completing one major artwork
- Printmaking: research ideas and techniques and produce an edition of prints
- Pottery/sculpture: analysing and examining past and contemporary works, making a figurative ceramic art work.

LEARNING OUTCOMES

- To enable students to compile a folio of art work which addresses all the above disciplines and illustrates evidence of a development of student's individual style and an appreciation of art aesthetics.
- The acquisition of skills enabling an individual or group presentation of an written, oral or power point assignment; which addresses the historical content of the course.
- To enable students to complete a major art piece in one or more of the listed disciplines and topics as listed.

VISUAL COMMUNICATION AND DESIGN

DESCRIPTION

This study introduces students to

- Architectural Drawing Plans
- Poster, Packaging & Designs
- A range of both computer and technical drawing
- Rendering techniques using different media

TOPICS

- Conceptualizing ideas through brainstorming
- Analysis of graphic materials
- Developing designing and finishing new products and building plans
- Final presentation of folio work

LEARNING OUTCOMES

- To enable students to develop skills in presentation of design work.
- To develop skills in graphic design and folio presentation.
- To enable students to complete a major graphics piece from initial idea to folio presentation.

TECHNOLOGY

ICT AND BUSINESS

This subject aims to introduce students to ICT, financial literacy, laws and current issues that are relevant to business environments. A range of topics and software are covered and students complete a research presentation on a topic of their choice.

TOPICS

Students will be involved in the following areas of study and skill development:

- Learning basic skills in Adobe Photoshop to create advertising products for their fictional business, and images for a website
- Using a content management system, such as Wordpress, to create a website for a fictional business
- Learning a range of skills in Excel
- A range of theory topics related to ICT issues, technology and ethics in Business
- Financial literacy covering a range of topics including interest, investments, credit cards, costs of purchasing a car and budgets

LEARNING OUTCOMES

- Analyse and develop solutions to information problems, both individually and as a team member. To get exposure to software, theory knowledge and ICT skills that will help students in their business lives.

DIGITAL IMAGING 2

DESCRIPTION

In this subject students develop knowledge and skills in the creation and use of web publications and digital imagery. This subject can prepare students for Year 11 ICT, Media, Visual Communication and Design and further tertiary study.

TOPICS

Students complete a range of tutorials and creative projects that focus on developing practical skills that can be applied to ICT and further digital practices

Students will complete a digital portfolio of work

Students gain an understanding of a range of roles that digital designers work within, including web publishing and online media

LEARNING OUTCOMES

- Students will analyse and develop solutions to information problems, both individually and as a team member, using a range of skill, processes and equipment.
- Students will also demonstrate skills and an understanding of:
- Image creation and digital manipulation using
- Adobe Photoshop and Adobe Illustrator
- Web page construction using WordPress and Dreamweaver
- Design and presentation principles for all media forms, how to make an impact to targeted audience
- Application of future career interests to specific skills and understandings of ICT, digital imagery and media jobs

DESIGN TECHNOLOGY: TEXTILES

DESCRIPTION

Students are introduced to folio development, design elements and principles, fashion illustration and garment construction. Students will produce a design folio and make a garment.

TOPICS

- Understand and learn the product design process
- Design and construct a garment using a commercial sewing pattern
- Evaluate production process and finished product
- Develop a client specific design folio, including a design brief, evaluation criteria, research and sketches

LEARNING OUTCOMES

- Analyse the appropriateness of using particular materials, including materials for specific purposes.
- Prepare detailed design briefs, make products using relevant equipment and analyse the effectiveness of the products with reference to specified criteria
- Develop innovative solutions to design and garment construction problems.

DESIGN TECHNOLOGY: WOOD

DESCRIPTION

Students construct a coffee table and/or other wooden projects using hand tools and some machine tools to develop skills in measuring, marking out, sawing, planing, chiselling and sanding.

TOPICS

- Health and safety
- Working from and developing innovative plans
- Production processes and techniques

LEARNING OUTCOMES

- Analyse the appropriateness of using particular materials.
- Prepare detailed design proposals, using traditional equipment and new technologies.
- Model making and prototyping using 3D printers
- Make products using some complex equipment.
- Develop innovative solutions to problems using qualitative and quantitative methods.

FOOD TECHNOLOGY: FOOD & NUTRITION

DESCRIPTION

This course allows students to look at hygiene and safety in food handling. Students will follow a course of study based on the nutrients, factors influencing food choice and associated dietary-related diseases.

Students develop their skills in descriptive writing in food preparation processes and describing sensory properties of food and presenting work using different forms of ICT. Production classes focus on exploring a wide range of different cooking methods, and students prepare dishes which are specifically linked to the learning outcomes.

TOPICS

- The Nutrients
- Dietary-related diseases
- Food Analysis

LEARNING OUTCOMES

- Show a clear understanding of major vitamins and minerals, and relevant dietary-related diseases.
- Demonstrate an understanding of vegetarianism and create a menu based upon optimising their nutrient intake.
- Prepare nutritious dishes that reflect healthy eating habits.

STEAM INDUSTRIAL DESIGN (DRONE MAKING)

Students who like to solve complex problems, have a passion for applied mathematics and enjoy working with their hands are ideally suited for this subject. Students will work through the product design process from identifying and defining the need, through to final construction and evaluation. Each stage of the design process is aimed at providing students with skills that allow them to realise their product. Students will be exposed to a number of new technologies such as CAD, CAM, vacuum forming and 3D printing, as well as traditional technologies and materials. Students will take home a working drone and controller.

TOPICS/OUTCOMES (RLT)

- Design folio which includes a design brief, research document/s, visualisations, design options, working drawings and measurements, production plan and risk assessment.
- Final product (working drone), journal and evaluation report.

LEARNING OUTCOMES

At the completion of the unit, it is expected that students will have achieved the following:

- Students will be able to apply the product design process to problem solving tasks.
- Students will be able to apply the product design factors when designing a product.
- Students will be able to apply research and develop solutions to a given program.
- Students will be able to apply drawing conventions when designing a product.
- Students will be able to apply computer aided design skills in designing a product.
- Students will be able to manipulate materials using various technologies.
- Students will be able to fly a drone using a controller.

HEALTH & PHYSICAL EDUCATION

SPORTS COACHING AND PERSONAL TRAINING

DESCRIPTION

PRACTICAL CONTENT

Students will complete a 6 week training program as well as the opportunity to participate in a range of physical activities including: football, soccer, basketball, netball, tennis, hockey, softball/baseball, gymnastics, aerobics and golf.

THEORETICAL CONTENT

TERM ONE: EFFECTIVE TRAINING PROGRAMS

Students will complete an activity analysis and fitness testing. They will study fitness programs and have an understanding of ways to improve relative fitness. They will develop a six week training program and perform the program during the semester.

TERM TWO: COACHING AND PRACTICE

Students will study different coaching styles, stages of learning and various forms and methods of practice. They will delve into examples of an exemplary coach and injury prevention, culminating in the student coaching a junior team.

ASSESSMENT

Both the practical and theoretical components of this subject must be passed. Assessment includes the following:

- Practical participation, teamwork and game play, class-work, tests, laboratory reports, written and oral reports and an end of unit exam.

SPORTS PHYSIOLOGY & PERFORMANCE

DESCRIPTION

PRACTICAL CONTENT

Students will have the opportunity to participate in a range of physical activities that may include football, soccer, basketball, netball, hockey, softball/baseball, aerobics and circuits and weight training.

THEORETICAL CONTENT

TERM ONE: HOW DOES THE BODY PRODUCE ENERGY?

- Students will study food fuels, energy systems, the body's use of oxygen and acute responses to exercise to understand how the body creates energy.

TERM TWO: BIOMECHANICAL PRINCIPLES

Students will be introduced to Biomechanics; including motion, human movement, newton's three laws, forces, levers, centre of gravity and momentum.

ASSESSMENT

Both the practical and theoretical components of this subject must be passed. Assessment includes:

- Practical participation, teamwork and game play, class-work, tests, laboratory.
- Reports, written and oral reports and an end of unit exam.

OUTDOOR EDUCATION

STUDENTS WHO INCLUDE ANY OUTDOOR EDUCATION ELECTIVES IN THEIR CHOICES WILL BE REQUIRED TO MEET THE CONDITIONS FOR SELECTION OUTLINED IN THE COLLEGE'S OUTDOOR EDUCATION POLICY.

STUDENTS CAN ONLY CHOOSE TO STUDY EITHER OUTDOOR EDUCATION OR ADVANCE. BOTH SUBJECTS REQUIRE AN APPLICATION TO BE COMPLETED.

OUTDOOR EDUCATION

(ONE SEMESTER SUBJECT)

DESCRIPTION

Outdoor education aims to introduce students to sustainable relationships between people and natural environment. Students would be involved in a range of outdoor activities and will be introduced to skills and techniques required for safe participation in the outdoors and general community, while developing an appreciation and understanding of the natural environment.

PRACTICAL CONTENT

Students will have the opportunity to participate in a wide range of practical based activities. These may include:

- Bush walking and camping
- Water based activities including swimming, surfing, and snorkelling
- Bike riding
- Rock climbing

THEORETICAL CONTENT

Students will investigate the theory component for certain outdoor activities as well as a number of learning modules will be undertaken, based on community, communication and project management.

Students will complete an assessment task each term, demonstrating subject specific content knowledge.

ASSESSMENT

Students need to pass both the Practical and theoretical component of this subject and successfully achieve standards in the recognised training course above.

‘ADVANCE’ - INCORPORATING OUTDOOR EDUCATION (TWO SEMESTER SUBJECT)

STUDENTS CHOOSING THIS SUBJECT MUST COMPLETE ‘ADVANCE’ FOR THE WHOLE YEAR.

DESCRIPTION

The main focus is on the participation of students in community life. This incorporates Outdoor Education, coursework and physical activities. There is a team work emphasis, where students are given the opportunity to be involved in a wide range of activities and experiences, and obtain certificates beneficial to future employment and their lives.

Get ready for an adventure that will take you into a new world - a world of the outdoors; a world across the seas with the opportunity to interact with local and overseas charities, schools and students; a world beyond what you know. Learn invaluable life skills - skills to become leaders in your community and in your own lives.

The learning program for the Outdoor Education component includes:

- Service
- Teamwork
- Adventurous Journey
- Skills
- Physical Recreation

Students will complete these components by participating in a variety of practical activities, including swimming, surfing, overnight camps, indoor rock climbing, bike riding and other activities. Please note that students are required to maintain a high level of fitness and participation is compulsory in all activities.

‘ADVANCE’ is a valuable lead up for VCE Health subjects, however is not a pre-requisite.

The ‘ADVANCE’ course is conducted under the banner of ‘Advance – A Victorian Program for Youth Development’. It is delivered through a partnership between the Office for Youth, the school and community organisations.

HEALTH: YOUR BODY, SEX AND SOCIETY

DESCRIPTION

This Course is a semester study of teen behaviours including

- Sexuality, sexual anatomy and practices, and harm minimisation;
- Pregnancy: stages of, contraception, and child development;
- Parenting responsibilities including care of newborns and toddlers;
- Issues affecting teens: partying, drugs, sexuality, eating disorders, and more;
- Driver safety: road accidents, your decisions and becoming a safe driver.

PRACTICAL CONTENT

Students will explore the content of each learning module, based on text content, research and first hand experience with relevant organisations.

THEORETICAL CONTENT

Students will explore the content of each learning module, based on text content, research and first hand experiences with relevant organisations.

ASSESSMENT

Students will be required to complete assessment tasks, topic tests and an exam to demonstrate content knowledge. They need to pass set assessment tasks, attend all class sessions with a mature attitude and behave within the school's ‘Code of Conduct’ to successfully complete this course.

LANGUAGES

FRENCH

Students should have completed Units 1-6 of Tapis Volant 2 or approximately 200 hours of instruction in French.

DESCRIPTION

The Year 10 French course corresponds very well to students who wish to become more advanced in French. This unit builds upon skills developed in Semester 2 at Year 9 level. Basic structures of French will be reinforced using graded reading materials and appropriate written tasks. It equips students to study French at VCE level.

TOPICS

French language and culture is taught through examination of the following topics:

- Tenses
- Art and History
- Food
- Expressing Feelings
- Story Telling
- Giving Instructions
- Travel and Getting Around

LEARNING OUTCOMES

- Listening – Use context and resources to decipher meaning.
- Speaking – Sustain a conversation of six to eight turns using suitable pronunciation and intonation.
- Reading – Show comprehension of a written document and identify important grammatical features of the text.
- Writing – Structure a text appropriate to its text type. Demonstrate understanding of frequently used language patterns.

JAPANESE

Students should have completed Units 1- 4 of Obento Supreme or equivalent.

DESCRIPTION

The course is intensive and equips students to cope with VCE Japanese. The emphasis is on communication competence and practical language skills, as well as proficiency in reading and writing Japanese scripts in a variety of contexts. Students will develop skills in understanding modified materials and communicating in a variety of situations.

TOPICS

Japanese language and culture is taught through the following topics:

- Shopping
- Describing People
- Food and Restaurant situations
- Japanese and Australian Schools
- Giving Directions
- Sports and Hobbies
- Part-time Jobs

LEARNING OUTCOMES

- Listening – Use context and resources to decipher meaning.
- Speaking – Sustain a conversation of three to five minutes using suitable pronunciation and intonation.
- Reading – Demonstrate comprehension of various types of modified written texts.
- Writing – Write and structure a text according to its text type, using known vocabulary, script and grammatical patterns.

YEAR 10 ELHES CURRICULUM

ELHES ENGLISH: LITERATURE VCE UNITS 1 & 2

DESCRIPTION OF COURSE CONTENT

This course is ideal for the keen, independent reader of fiction, who is able to write fluently and enjoys the close reading of fiction texts. The course involves intensive study of a range of challenging fiction, both from past and contemporary social and cultural contexts, and includes the close study of plays, novels, short stories, poetry and films.

This study is designed to enable students to:

- develop an enjoyment of literature through reading widely, imaginatively, critically and independently;
- gain an understanding of the variety of human experience;
- develop a critical awareness of cultures past and present, as they are represented in literature;
- read closely and engage in detailed critical analysis of the key literary features;
- develop interpretive skills and extend their understanding of the different ways literary texts are constructed;
- develop the capacity to write confident analytical and creative responses to texts.

UNIT 1

This unit focuses on the ways literary texts represent human experience and the reading practices students develop to deepen their understanding of a text.

UNIT 2

The focus of this unit is on students' critical and creative responses to texts. Students extend their exploration of the ideas and concerns of the text. They understand the ways their own culture and the cultures represented in the text can influence their interpretations and shape different meanings.

ASSESSMENT OF UNIT:

You will make personal, creative, critical and analytical responses to these texts, showing your understanding of character, language, structure and meaning of these texts.

You will be assessed by completing a variety of written responses to literature, and examinations at the end of each semester.

ELHES HUMANITIES: HISTORY - 20TH CENTURY VCE UNIT 1 (SEMESTER 1)

DESCRIPTION OF COURSE CONTENT

UNIT 1 – 20TH CENTURY HISTORY 1900-1945

- Reason why World War I occurred
- Life in the trenches
- The rise of Hitler, the Nazi party and the Nazi movement
- Anti-Semitism
- The Holocaust
- Art during the Weimar Republic

ASSESSMENT OF UNIT

UNIT 1 – 20TH CENTURY HISTORY 1900-1945

- An essay on how Nazism was dominant in the 1930's
- Oral presentation on a Holocaust survivor
- Short answer and document analysis on art in the Weimer Republic

ELHES HUMANITIES: AUSTRALIAN & GLOBAL POLITICS VCE UNIT 1 (SEMESTER 2)

DESCRIPTION OF COURSE CONTENT

UNIT 1: THE NATIONAL CITIZEN

Area of Study 1: Power, Politics and Democracy.

Students will investigate the nature of politics, examining the way individuals and groups gain and exercise political power, and asking what are most significant features of political practise in Australia. Students are introduced to politics and power in its broad sense as defined by the ability to exert influence over individuals and groups. This will be achieved through an analysis of contemporary issues and events, with students considering the impact of the Australian system of government and politics.

Area of Study 2: Exercising and Challenging Power.

Students will dive deeper into the philosophical underpinnings of politics, investigating why individuals become involved with organised political institutions, why political leaders appear to share similar aims, the major political ideologies, and the goals of some of the most significant political movements in Australia. Ideologies that motivate movements, groups and individuals that will be examined include: conservatism, liberalism, social democracy, socialism, libertarianism and fundamentalism.

ASSESSMENT OF UNIT

Australian and Global Politics is assessed through research reports, case studies, essays and oral presentations.
